

## Artikelspezifikationen

### Ammoniumchlorid 99,7% zur Analyse

| Merkmal (Analysemethode)             | Spezifikation |
|--------------------------------------|---------------|
| Gehalt                               | > 99,7 %      |
| Glührückstand (als SO <sub>4</sub> ) | <0,01%        |
| Phosphat (PO <sub>4</sub> )          | <0,0002%      |
| Sulfat (SO <sub>4</sub> )            | <0,002%       |
| Iodid (I)                            | <0,001%       |
| Nitrat                               | <0,001%       |
| Schwermetalle (als Pb)               | <0,0005%      |
| Arsen (As)                           | <0,00005%     |
| Calcium (Ca)                         | <0,0005%      |
| Cadmium (Cd)                         | <0,0005%      |
| Cobalt (Co)                          | <0,0005%      |
| Chrom (Cr)                           | <0,0005%      |
| Kupfer (Cu)                          | <0,0001%      |
| Eisen (Fe)                           | <0,0002%      |
| Kalium (K)                           | <0,005%       |
| Magnesium (Mg)                       | <0,0005%      |
| Natrium (Na)                         | <0,005%       |
| Nickel (Ni)                          | <0,0005%      |
| Blei (Pb)                            | <0,0001%      |
| Zink (Zn)                            | <0,0002%      |
