

## Artikelspezifikation

### Salzsäure 37% zur Analyse

| Merkmal (Analysemethode)    | Spezifikation |
|-----------------------------|---------------|
| Gehalt                      | 36,5-38 %     |
| Farbe (Hazen)               | <=10          |
| Sulfat (SO <sub>4</sub> )   | <0,0001%      |
| Sulfit (SO <sub>2</sub> )   | <0,0001%      |
| Phosphat (PO <sub>4</sub> ) | <0,00005%     |
| Ammonium (NH <sub>4</sub> ) | <0,0001%      |
| Beryllium (Be)              | <0,000002%    |
| Blei (Pb)                   | <0,000001%    |
| Bromid (Br)                 | <0,005%       |
| Calcium (Ca)                | <0,00002%     |
| Eisen (Fe)                  | <0,00001%     |
| Kalium (K)                  | <0,00001%     |
| Kobalt (Co)                 | <0,000001%    |
| Kupfer (Cu)                 | <0,000002%    |
| Lithium (Li)                | <0,000001%    |
| Magnesium (Mg)              | <0,000005%    |
| Mangan (Mn)                 | <0,000001%    |
| Natrium (Na)                | <0,00005%     |
| Nickel (Ni)                 | <0,000002%    |
| Zink (Zn)                   | <0,000005%    |
